

MRP01 Electronic Panoramic Head
Manual

1.Packing Accessories

2.Specification

Model: MRP01
Diameter* Height: 72 mm*70 mm
Stand-by Time: Over 12H
Rotational Speed:2-5r/min
Weight:205g
Continuous Working Time:Over 9H
Nominal Voltage:3.7 V
Max No-load Current:65mA Max
Battery Capacity:750 mAh
Compatible Bluetooth system: above Android 2.3.3, iOS4.0

Pan Max. Load:Within 500g
Tilt Max. Load:Within 200g
Vertical Max. Load:Within 200g
Inverted Max. Load:Within 300g

3.Profile

- a 1/4" Universal Screw
 - b Rotator
 - c Signal Receiver
 - d USB Charging Port
 - e Support Leg
 - f 1/4" Screw Hole
 - g Power On/Off
 - h Indicator Light
- a 1/4" screw is easily adaptable to mobile phone, GoPro camera, pocket camera, mini-SLR camera and other equipment.
- b 360 degree panoramic photography,more stable electronic rotation,more convenient Bluetooth remote control.
- d Easy USB port charging by computer and normal mobile charger.
- e Perfect combination between supporting legs and head body, exquisite workmanship, smart and innovative structural design to make sure the stability.
- f Perfect match with selfie stick, tripods and other camera accessories.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
